# OUR VISION

**Re-use** was founded to reduce landfill, and advance sustainability in Australia. We are passionate about achieving our vision, and work with clients to help them achieve their sustainability goals.

Founded by Sustainability specialist Bianca Donnelly, through expert consulting and tailored solutions, we assist government department, major builders, asset funds and small business to meet their sustainability targets.

Let us help you on the road to sustainability.

**Bianca Donnelly**  
Founder

We have re-homed more than:

40,000 +

Office Chairs

10,000 +

Storage Cabinets

30,000 +

Office Desks

# CONSULTATION & AUDITING

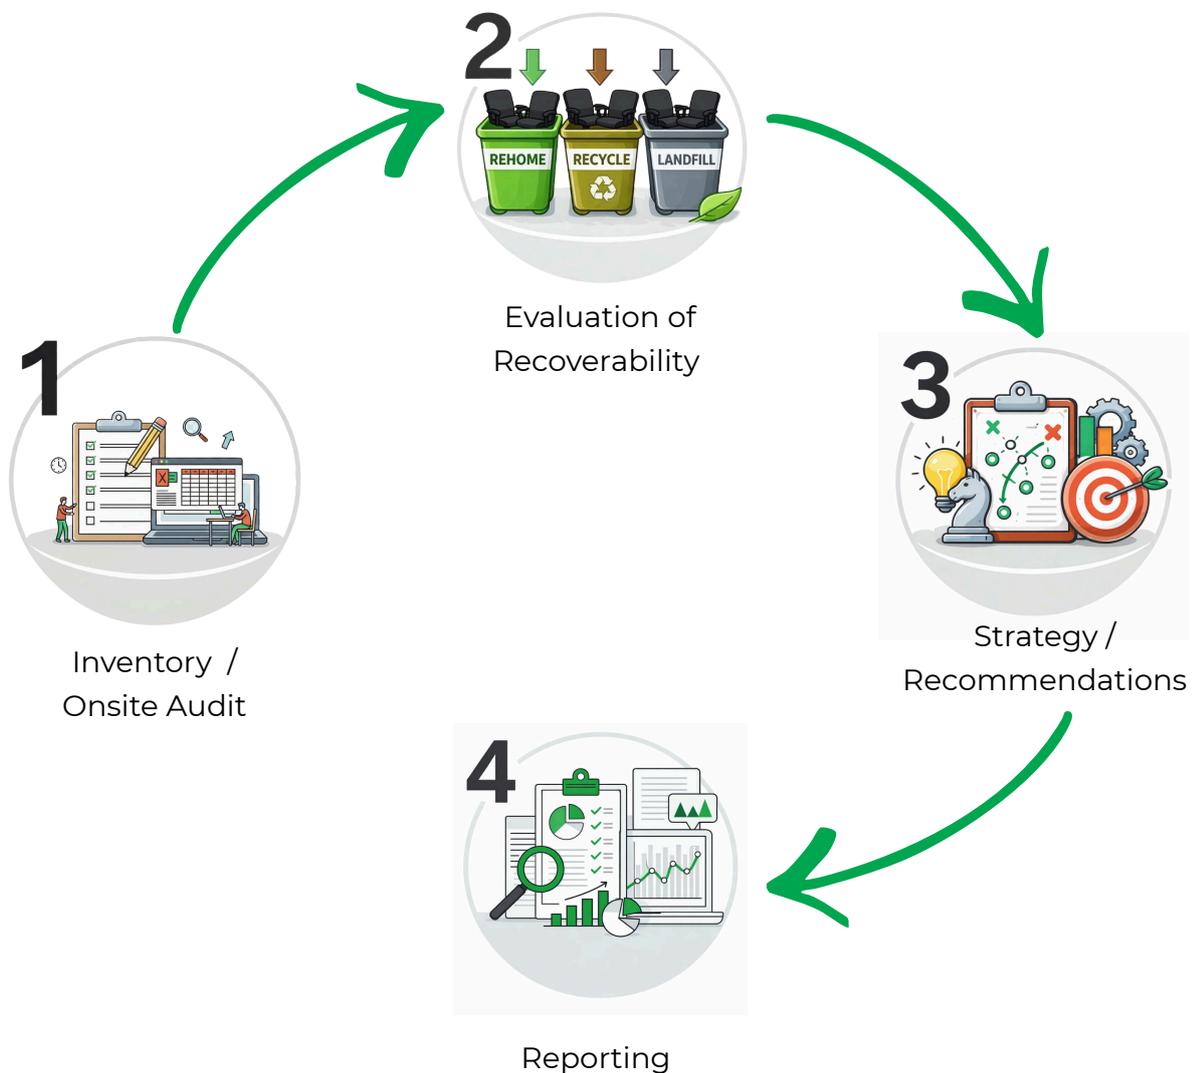

Re-use Projects Australia specialise in comprehensive auditing services of commercial assets for end of lease and refurbishment.

Our team conducts detailed assessments to identify assets that can be reused or recycled.

We evaluate each item to determine its condition, considering factors such as material wear, structural integrity and market demand.

Our material recoverability audit provides valuable insights into the recoverability of valuable assets, enabling clients to make informed decisions about disposal, refurbishment or recycling.

Additionally, the report includes actionable recommendations to help our clients deliver their recycling targets and achieve their desired Greenstar Rating.

# PROJECT MANAGEMENT

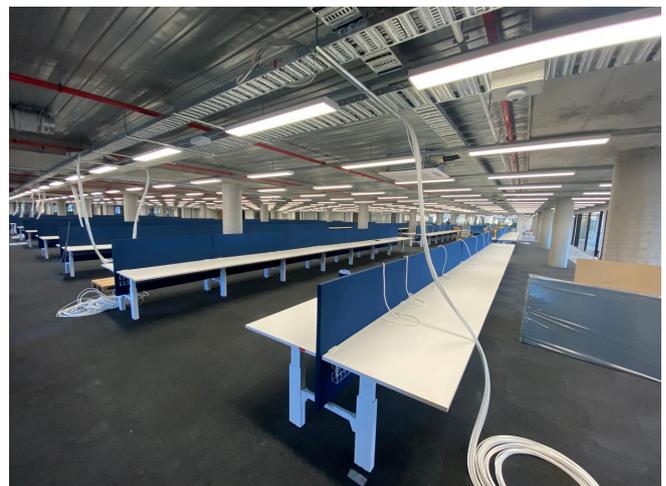

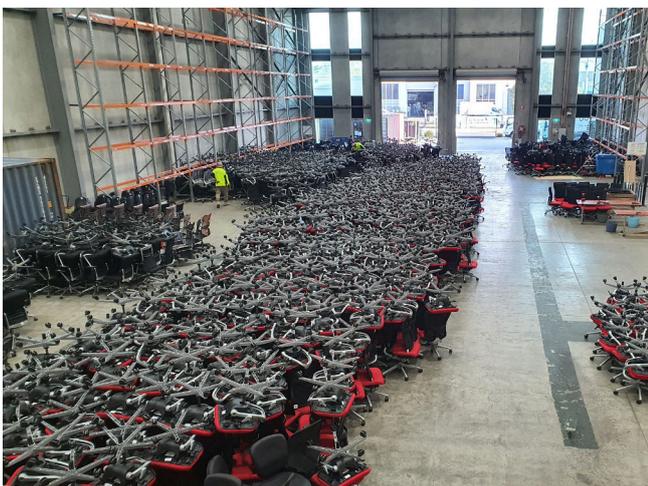

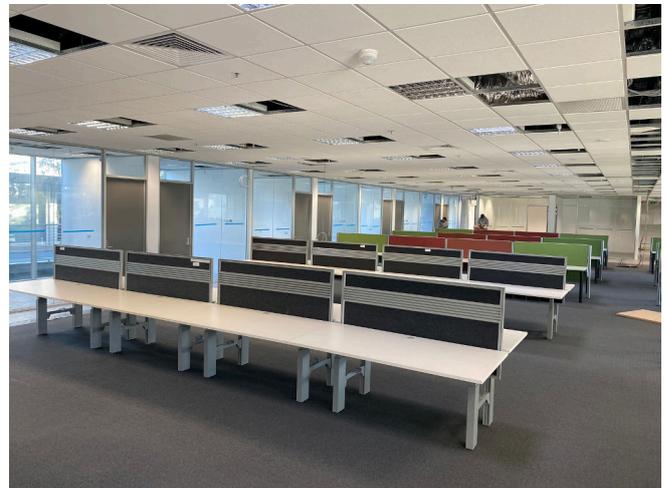

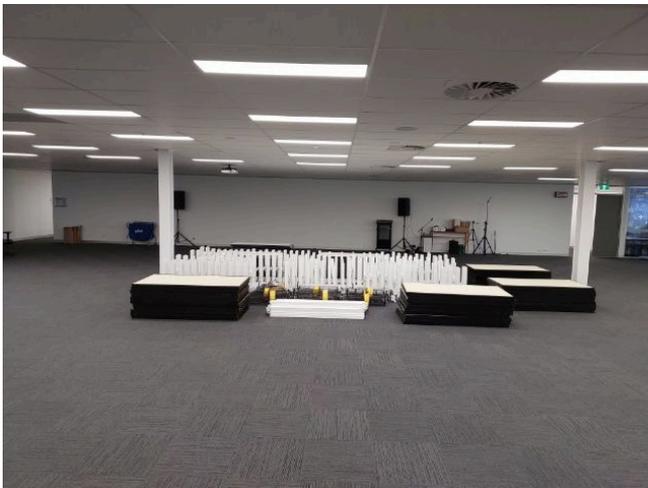

Re-use Projects Australia provides comprehensive project management for commercial asset recovery.

We handle all aspects of sustainable asset disposal, allowing clients to focus on their business.

Our services include:

What we do:

1. Initial Auditing
2. Development and Management of Budgets
3. Recommendations
4. Engagement and Management of Subcontractors (where required)
5. Creation of Programs / Scheduling of Asset Removal and Recycling
6. Documentation and Reporting

# OFFICE REMOVALS

With hundreds of office spaces stripped out and re-tenanted in Melbourne every year, it is often too difficult and time-consuming for the previous tenant to re-sell their existing furniture.

This is how high-quality office furniture ends up going to landfill and why we decided to provide another option.

We rescue used office furniture that is still very high quality (in some cases like new). Sustainability is our main priority and by ensuring that as much office furniture as possible stays out of landfill, we are able to offer you an economical option for your office fitout.

Some of the many items that we recycle include workstations, desks, task chairs, ergonomic office chairs, boardroom tables, filing cabinets, compactus units, kitchen equipment, couches, carpet tiles, and much more.

## How it Works

**Initial Contact**

**Review Furniture**

**Site Visit**

**Quote / Offer**

**Project Pre-Planning**

**Works Commence**

**Reporting**

**Recycle / Re-home**

# PACKAGES & INSTALLATIONS
